Buglo

Let’s **discover**

Bartosz Krzemiński
CEO Buglo Play

We're a joy factory! I love saying that, because what could be more exciting than creating positive energy? It turns out that you can - and that's exactly what we do at Buglo. How's it possible? The joy of playing on Buglo equipment always comes hand in hand with growth.

We believe that in those carefree moments on the playground lies remarkable power. It's there that children prepare for life in a community - learning tolerance, cooperation, and responsibility. On the playground they train their motor skills, strengthen their bodies and discover new abilities through a wide range of physical activities. It's also where they develop inner strength - by taking risks and showing courage, young people build confidence.

Buglo equipment is therefore much more than joy. It's more than durable materials, safe technologies, and distinctive design. It's a tool that helps children open up to the world, a space where they learn how to be kind human beings, a place where they can take their first steps towards great challenges.

Buglo is more than a joy factory - it creates joyful development. When you choose any product from this Buglo catalogue, you're investing in the happiness and growth of the youngest in your community.

How do we know Buglo playgrounds truly meet children's needs?

We've got a few reliable sources!

We talk to children

Once a month, we welcome our youngest testers to Buglo. They're the ones who truly know what brings the most joy. Their honest feedback helps us create solutions that genuinely match their tastes.

We listen to architects

Close cooperation with architects allows us to better understand their expectations. Regular consultations help us design spaces that are functional, visually appealing, and eye-catching for parents, while giving children pure pleasure in play.

We prioritise safety

Safety, durability, and reliability require constant management. We carry out our own internal inspections and proudly pass tests conducted by independent institutions. Our equipment meets all required standards and holds the necessary certifications.

We learn from experts

With insights from specialists in the Buglo Experts Circle - including cognitive scientists, psychologists, and physiotherapists - our playgrounds and recreational zones support healthy development, physical activity, and social integration.

Homo Ludens

Podcast Homo Ludens by Buglo

If you'd like to learn even more about playgrounds, why not listen to our podcast? Homo Ludens by Buglo features conversations with experts exploring how to create spaces that are smart and beautiful, safe, standards-compliant, and environmentally friendly.

Listen now!

How do experts influence our products?

Jens Bo Thorsager
CEO Elverdal

The latest Mega Robinia tower stands nearly 9 metres tall. Climbing it takes courage and a willingness to take risks. Jens Bo Thorsager, CEO of Elverdal, reinforced our belief that safety and risk must be in balance:

„Risk is always good. If you don't understand it, you make poor decisions. Playgrounds are places where children can experience risk in a controlled way."

Przemek Staroń
Psychologist | Lectuer | Educator

A key activity on the Robinia towers is the BeBrave game.
Przemek Staroń emphasises how important it is to tell children **"be brave"** rather than "be careful." This strengthens their sense of agency and builds self-confidence. Inspired by this idea, we created **BeBrave,** a game that encourages action, gives a sense of purpose, and opens up a world of "superpowers" for children.

Marek Purczyński
Physiotherapist

Exercising has never been easier
Thanks to our fitness experts, working out has become simple and accessible - whether you're just starting out or looking to take your skills to the next level.

Marek Purczyński - physiotherapist and the most popular YouTube creator in this field in Poland - demonstrates how to use our Fitness equipment at both beginner and advanced levels. He focuses on proper technique, common mistakes, and how to properly engage different muscle groups. Just scan the QR code on the equipment to start your workout.

Spaces full of values

Our experts emphasise the importance of creating spaces that are welcoming and accessible for everyone. Professor Maciej Błaszak from Adam Mickiewicz University points out that any situation of social exclusion activates the brain's pain system: **„Fairness on the playground means that every child should feel equally comfortable. A playground should be universal."**

That's why when designing spaces, we make sure to keep everyone in mind - older children, younger children, parents, and teenagers. An inclusive space is one where everyone can find their place.

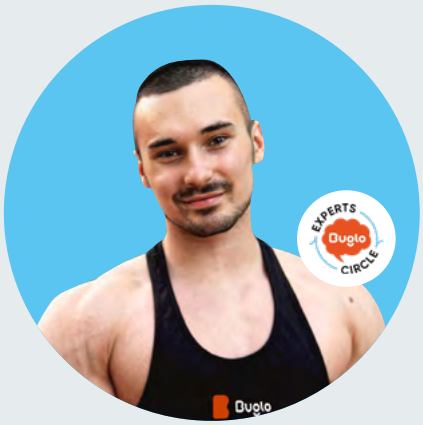

Prof. Maciej Błaszak, DSc
Cognitive science

Discover our inclusive equipment!

1. **Inclusivity**
2. **Integration**
3. **Ecology**

The same approach applies to our **Street Workout collection**. Together with **six-time Polish champion Mateusz Płachta**, we've prepared a series of instructional videos, from the very basics to advanced moves like the human flag. Our goal is to make it easy for anyone to start and gradually develop their skills.

Mateusz Płachta
6-time Polish **Street Workout Champion**

Individual projects

The number of creative projects we complete grows every year.

Our Creative Projects Team brings dream playgrounds to life for our partners around the world. They analyse needs, adapt designs to the environment, ensure structural safety, and above all, deliver exceptional fun. As part of our modification process, we can adjust various elements of our standard products, like the **layout, colour or functionality, or design** something entirely new!

"Let's make more fun!"

Check out our projects and get inspired!

SHAPE
WAVE MASTER

A method that allows pipes to be bent at any angle while preserving the integrity of the steel surface, enabling sleek and flexible structures.

COLOUR
WAVE MASTER

A painting technique that merges two colors seamlessly, achieving a natural blended effect that adds depth and dimension to the design.

ROTO
FORM MASTER

A technique for molding plastics into any desired shape, opening up endless possibilities for creativity and innovation.

CUSTOM ART
MASTER

A technology that allows any graphic to be permanently transferred onto HPL panels, creating durable and vibrant visual effects.

Andrzej Sas
Commercial Director
Buglo Play

The joy of Buglo playgrounds has already reached nearly every continent - we're now present in over 60 countries around the world.

It's amazing to see how play brings children together, no matter their cultural, linguistic, or environmental differences. Everywhere we hear children's laughter, we know our work matters.

Our global presence is a source of great pride, but also comes with great responsibility. We know that Buglo playgrounds will become part of daily life and childhood for generations to come. That's why we place such importance on safety, inclusivity, development, and sustainability. Together with our partners worldwide, we treat every project as an investment in the future of children.

We believe that smart, engaging, and safe play lays the foundation for a better world - the world that today's children will shape tomorrow.

In harmony with nature - Recycled Line

Did you know that all Buglo equipment can be made from recycled materials?
The growing environmental awareness around us is great news, and we're developing in that direction too. We're currently measuring the carbon footprint across the entire life cycle of our products - from sourcing raw materials to recycling the equipment at the end of its life.

We're already making changes

We use panels made of at least 80% recycled materials, which are themselves 100% recyclable. They are produced from ocean waste, as well as recycled industrial bottles and agricultural pipes.

What are **Recycled Line** playgrounds made of?

Wooden poles

Biopolymers in the rotomoulding process

Wall board from recycling

Recycled steel

Good fun helps children grow, connect and learn on many levels - so there's no time to waste! Responding to the growing demand for Buglo products, we're launching another joy factory in 2026. Covering over 5,000 m^2, the new space will be dedicated to producing wooden playgrounds.

The shift towards natural materials and the rising popularity of eco-friendly solutions have made playgrounds produced from natural resources increasingly popular with our customers. By opening the new factory, we'll increase our production capacity, which means faster availability of Robinia Play equipment - and faster access to nature-inspired play for children.

Łukasz Gośniak
